# Delivery instructions

Date: 08/2016

## Packaging materials and packaging

In addition to the Delivery Instructions, General Section, the following specifications apply to packaging materials and packaging:

**Table of contents**

**Packaging materials and packaging ..... 1**

**1. Definition ..... 1**

**2. Random samples and testing certificate..... 1**

**3. Palettes..... 1**

## Packaging materials and packaging

All packaging materials must be delivered as single products from single batches. Possible exceptions for package inserts and printed aluminium films require Teva's written approval.

### 1. Definition

The category of packaging materials and packaging includes the following materials:

- Folding boxes
- Package inserts
- Labels
- Films (aluminium, plastic, ...)
- Pumps
- Glass
- Cartons
- Closures/bags
- Tubes
- Tins
- Pallets
- Printed materials

### 2. Random samples and testing certificate

Where not otherwise regulated in a quality assurance agreement, each delivery requires a random sample according to the appropriate error assessment list or DIN 2859 (reduced testing level) as well as the relevant testing certificate.

The supplier must add the random samples in clearly labelled cartons to one pallet of the delivery.

The testing certificate should either be a component of the delivery papers or must be sent by email no later than the day of delivery to:

- [DL-DE-QKPMK-P@ratiopharm.de](mailto:DL-DE-QKPMK-P@ratiopharm.de)

### 3. Pallets

#### 3.1. Weight

The pallet weight must not exceed 800kg incl. pallet.

#### 3.2 Height

national: max. 1.50m

international: max. 1.15m
